

HIFU MediLIFT

NON-INVASIVE FACELIFT & SKIN TIGHTENING

The HIFU MediLIFT delivers clinically proven non-invasive skin tightening and lifting treatments for the face & body with superior results from just one treatment.

Innovative combined 4D HIFU and Radial Wave technology

4D HIFU

- ✓ Facelift
- ✓ Collagen Boost
- ✓ Neck & Jowl Lift

Lift and tighten large areas of the face quickly with multiline 4D HIFU, designed to stimulate the production of new, thicker collagen fibres and reduce the appearance of deep lines and wrinkles.

Radial Wave

- ✓ Crows Feet
- ✓ Frown Lines
- ✓ Mouth Lines

NEW! Radial Wave technology enables precision targeting of smaller areas around the eyes, brow and mouth for superior treatment coverage and enhanced clinical results.

Incredible results from just one treatment...

- ✓ Clinically proven technology
- ✓ Immediate results that improve
- ✓ Non-invasive with no downtime
- ✓ Treats the face & body
- ✓ Suitable for light & dark skin

SKYNCARE
TECHNOLOGY FOR AESTHETICS PROFESSIONALS

Clinically proven,
surgical alternative
technology.

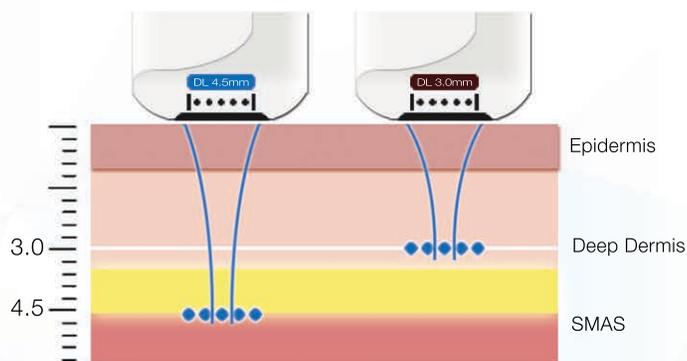

The ultimate non-invasive facelift treatment

The HIFU MediLIFT delivers High Intensity Focused Ultrasound (HIFU) energy that bypasses the epidermis to precisely target the underlying structural tissues of the deep dermis and the Superficial Muscular Aponeurotic System (SMAS). Here, focal point temperatures of 60-65°C stimulate the production of new viscoelastic collagen and elastin, which thickens the connective tissue layers, tightening the skin to lift and rejuvenate its appearance.

“ After just one treatment, my skin immediately looked and felt tighter, and continued to improve for several months. My friends say I look so much younger, healthier and less tired. I’m so pleased with my incredible results! ”

Faster, Superior Treatments

By using the HIFU MediLIFT’s advanced multiline treatment cartridges, multiple shot lines are delivered together to enable precision control of the distance between each line. This produces unparalleled treatment uniformity for superior results, while reducing treatment times by up to 50%.

- ✔ Multiline technology for superior treatments
- ✔ Fast treatments for higher client turnover
- ✔ 5-star skin tightening results
- ✔ Combined 4D HIFU & Radial Wave technology

Uniform treatment lines from the HIFU MediLIFT multiline cartridges facilitate a fast, even, professional result.

Traditional single line cartridges require longer treatment times and increase the likelihood of sporadic treatment lines.

SKYNCARE PROVIDES MORE THAN JUST GREAT TECHNOLOGY

When you choose Skyncare, you choose more than just market-leading technology. You get training from industry experts, on-going technical support, advanced marketing and a company that wants to ensure your business succeeds and stands out from the crowd.

Providing **engaging digital materials** to help you attract new clients and pre-launch your new treatments to ensure you have **clients excited** about booking ASAP.

I got so much interest from my pre-launch posts, I had a wait list for patch tests that made my launch event so successful!

The training I received was exceptional and Skyncare delivered the machine and training to my salon.

Full product training **at your clinic** that leaves you feeling **super confident** using your new device and explaining treatments to your clients.

Post training, we provide **on-going support** for device queries, treatment knowhow and more via our dedicated telephone line, WhatsApp channel and email, so there is always somebody to support you!

The Skyncare team are extremely helpful and knowledgeable. Nothing is too much trouble for them when I need extra help or advice.

I always hated the amount of time I wasted on social media, but since joining the Academy, my followers & engagement have skyrocketed!

Our Skyncare Academy helps expand your social media knowledge and provide all your social media post captions, written for you each month to allow you to stay **5 steps ahead** of your competitors.
